PROJECTS

SPOTIFY CLONE:

- Developed an intuitive and visually appealing user interface (UI) reminiscent of Spotify's design language.. Leveraged expertise in front-end development to ensure the UI is user-friendly and responsive across devices.
- Integrated APIs seamlessly to enable music playback and access to a vast music library.
- Focused on delivering a high-quality music streaming experience with smooth functionality.
- Demonstrated proficiency in both UI design and front-end development to create a polished music streaming application.

PORTFOLIO WEBSITE:

- Developed a web app portfolio using ReactJS and Bootstrap for sleek and responsive design.
- Incorporated ThreeJS to integrate 3D models, enhancing user interaction and engagement.
- Showcased a diverse range of projects within the portfolio, each project linked for easy access.
- Included resume links for further information about projects and professional background.
- Implemented a contact section enabling users to send messages via email, utilizing EmailJS.

Blog Website:

- Developed a React blog application proficiently utilizing Axios for efficient API data retrieval.
- Implemented features for creating, editing, and deleting blog posts within the application.
- Utilized React components to organize and manage the user interface effectively.
- Focused on user-friendly design and intuitive navigation for enhanced usability.

News App:

- Developed a responsive news website with HTML, Bootstrap, CSS, and JavaScript which includes hover effects and filtering options. Used the India News API.
- Provided filtering options for news types, including defence, countries, states, and finance.

HONORS AND AWARDS

-
- Part of college cricket team
